The MAILING DATE of this communication appe	ars on the cover sheet with the c	correspondence add	ress
THE REPLY FILED <u>22 December 2010</u> FAILS TO PLACE THIS	S APPLICATION IN CONDITION F	OR ALLOWANCE.	
1. The reply was filed after a final rejection, but prior to or on this application, applicant must timely file one of the follow places the application in condition for allowance; (2) a No a Request for Continued Examination (RCE) in compliance time periods:	wing replies: (1) an amendment, aff tice of Appeal (with appeal fee) in o se with 37 CFR 1.114. The reply mo	idavit, or other evider compliance with 37 C	ce, which FR 41.31; or (3)
 a)	dvisory Action, or (2) the date set forth ater than SIX MONTHS from the mailing	g date of the final rejecti	on.
Examiner Note: If box 1 is checked, check either box (a) or (TWO MONTHS OF THE FINAL REJECTION. See MPEP 70 Extensions of time may be obtained under 37 CFR 1.136(a). The date have been filed is the date for purposes of determining the period of extunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b) NOTICE OF APPEAL	06.07(f). on which the petition under 37 CFR 1.1 tension and the corresponding amount shortened statutory period for reply orig than three months after the mailing da	36(a) and the appropria of the fee. The appropr inally set in the final Offi	te extension fee ate extension fee ce action; or (2) as
2. The Notice of Appeal was filed on A brief in comp filing the Notice of Appeal (37 CFR 41.37(a)), or any exter a Notice of Appeal has been filed, any reply must be filed	nsion thereof (37 CFR 41.37(e)), to	avoid dismissal of th	
AMENDMENTS			
 The proposed amendment(s) filed after a final rejection, I They raise new issues that would require further contour (b) They raise the issue of new matter (see NOTE below) They are not deemed to place the application in bet 	nsideration and/or search (see NO w);	TE below);	
appeal; and/or (d) They present additional claims without canceling a control of the control of	corresponding number of finally rej	ected claims.	
NOTE: (See 37 CFR 1.116 and 41.33(a)). 4. The amendments are not in compliance with 37 CFR 1.12	01. San attached Nation of Nan Co	mpliant Amandmant	(DTOL 204)
 The amendments are not in compliance with 37 GFR 1.1. Applicant's reply has overcome the following rejection(s) 		impliant Amendment	(FTOL-324).
 Applicant's reply has overcome the following rejection(s) Newly proposed or amended claim(s) would be al non-allowable claim(s). 	· · · · · · · · · · · · · · · · · · ·	timely filed amendme	ent canceling the
7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is provided that the status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected: Claim(s) withdrawn from consideration:		II be entered and an e	explanation of
AFFIDAVIT OR OTHER EVIDENCE			
 The affidavit or other evidence filed after a final action, bu because applicant failed to provide a showing of good and was not earlier presented. See 37 CFR 1.116(e). 	d sufficient reasons why the affiday	rit or other evidence is	necessary and
9. The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to o showing a good and sufficient reasons why it is necessary	vercome <u>all</u> rejections under appe y and was not earlier presented. S	al and/or appellant fa ee 37 CFR 41.33(d)(ls to provide a).
10. ☐ The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER	n of the status of the claims after e	ntry is below or attach	ned.
11. The request for reconsideration has been considered bu See Continuation Sheet.	t does NOT place the application in	n condition for allowar	nce because:
12. Note the attached Information <i>Disclosure Statement</i> (s). 13. Other:	(PTO/SB/08) Paper No(s)		
/Brian A Zimmerman/ Supervisory Patent Examiner, Art Unit 2612			

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues on the last paragraph of page 13 that the process in Horwitz is an entirely analog analysis such that Horwitz does not disclose the recited analog to digital conversion or analysis of the resultant digital signal. The examiner respectfully disagrees. Horwitz discloses the received signals are converted to digital signals in the air interface stage 31 and the data interface 32 (See Figures 4(a) to 4(b) and Col. 9, line 16 to Col. 10, line 20) the analog to digital conversion performed by the circuit components depicted in Figures 4(a) and 4(b).

Applicant next argues on the first paragraph of page 14 that Horwitz never states that its microprocessor in control module 11 is used in pluse shaping or protocol identification. The examiner respectfully disagrees. Horwitz specifically discloses on col. 10, lines 18-20 that the received pulses are processed by a data protocol decoder in the data interface and protocols stage 34 of the interrogator control module 11.

Applicant further argues on the first paragraph of page 14 that the pulses are probably converted to digital signals in later application interface stage 36 in Horwitz, where the microprocessor is located. The examiner respectfully disagrees. As indicated above, the received signals are converted to digital signals in the air interface stage 31 and the data interface 32 (see col. 9, lines 16-19), not application interface stage 36.

Applicant further argues from the last paragraph of page 14 to the first paragraph of page 15 that there is no digital functions present in Horwitz for "identifying, with a digital processor, which transponder signaling protocol of the plurality of transponder signaling protocols was used...the identifying being based on the first digital signal." The examiner respectfully disagrees. As shown in col 8, lines 7-30 of horwitz, the FPLD is programmed to accept the data rates and protocols available on the various types of tags 2, 4, 6 or 8. Furthermore, as shown in col. 10, lines 32-35, the programmed microprocessor performs code checking and CRC decoding to select the tag data stream which does not have any code violations and a successful CRC result, which demonstrates digital signal processing done by the microprocessor.

Applicant argues on the last paragraph of page 15 that Horwitz does not perform an analog to digital conversion to determine transmission protocol as recited in the claims. The examiner respectfully disagrees. As shown in col 8, lines 7-30 of horwitz, the FPLD is programmed to determine transmission protocol after the analog to digital conversion is performed by air and data interfaces (31 and 32).
